Chapter 10
Cushing Syndrome

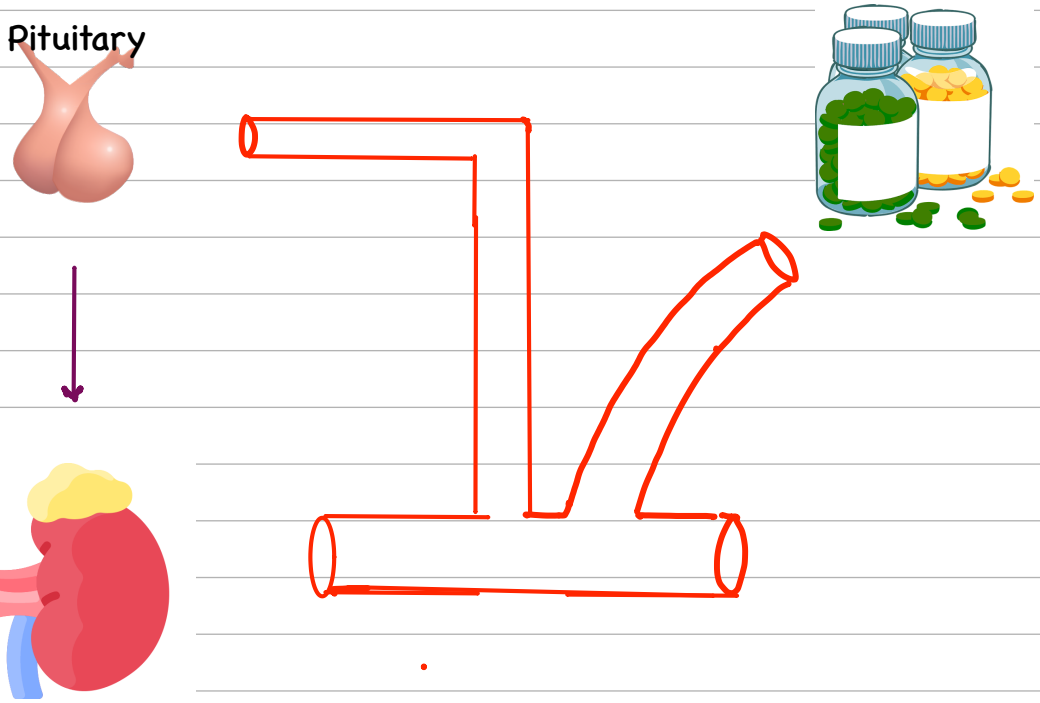

DEFINITION - increase in .....

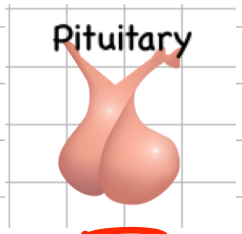

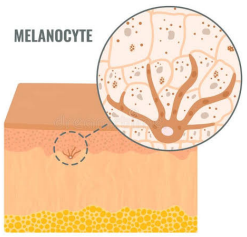

Etiopathogenesis

1. -

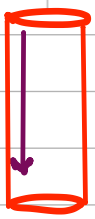

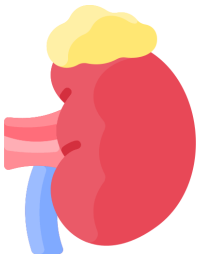

2.-

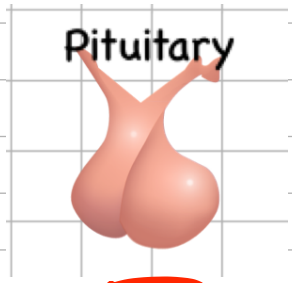

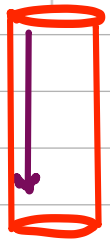

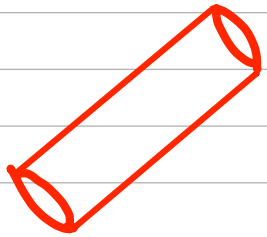

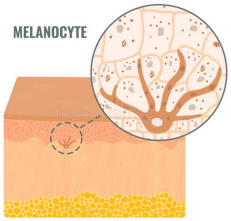

3.

	Iatrogenic	Pituitary tumor	Lung cancer
Cortisol			
ACTH			
Pigmentation			
Headache			
Hemoptysis			

C/f -

Blood sugar -

BP -

Work up → Cushing suspected

1. Screening test of choice →

2. IOC →

To differentiate between iatrogenic **v/s** pitutory tumor / lung cancer

3.

Managment-

1. Cortisol receptor antagonist-

2. Cortisol synthesis inhibitor -

3 .In Cushing Disease to decrease release of ACTH from pituitary tumor -

Summary of cushing syndrome

1. M/C/C of cushing syndrom -
2. 2nd MCC of Cushing syndrome ....c/a ....
3. earliest pathological change of cushing syndrome -
4. MC C/F -
5. Blood sugar .....and BP.....
6. pigmentation of skin is seen if cause of cushing syn is .....
   .....
7. Screening test of choice
8 IOC
9 To differentiate between pituitary adenoma v/s lung cancer -
